ORONOGO, MO 64855

Type: ROUTINE INSPECTION

Date: Sep-01-2010

### 3.1 (e)

#### HOUSING FACILITIES, GENERAL.

Sec. 3.1 Housing facilities, general.

(e) Storage. Supplies of food and bedding must be stored in a manner that protects the supplies from spoilage, contamination, and vermin infestation. The supplies must be stored off the floor and away from the walls, to allow cleaning underneath and around the supplies.

There was an opened, partial bag of puppy food sitting on the of the kennel building. There was no container in the facility for storage of the dog food that would protect it from contamination. The owner needs to store all opened dog food in a container that protects the supplies from spoilage, contamination, and vermin infestation. This is necessary to provide the animals with wholesome, uncontaminated food

This affects 6 dogs

To be corrected by 3 September 2010

Inspection and exit interview conducted by the owner and David Brigance, ACI

### 2.126

#### ACCESS AND INSPECTION OF RECORDS AND PROPERTY.

Sec. 2.126 Access and inspection of records and property.

Repeated failure to make a responsible adult available to accompany APHIS officials during the inspection process.

A responsible adult was not available to allow access and accompany inspection at 9:30 on 18 August 2010; at 12:00 on 24 August 2010; at 10:30 on 26 August 2010.

Note: This inspection report is being sent by regular and certified mail.

### 3.11 (a)

#### CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

Sec. 3.11 Cleaning, sanitization, housekeeping, and pest control.

(a) Cleaning of primary enclosures. Excreta and food waste must be removed from primary enclosures daily, and from under primary enclosures as often as necessary to prevent an excessive accumulation of feces and food waste, to prevent soiling of the dogs or cats contained in the primary enclosures, and to reduce disease hazards, insects, pests and odors.

There is an accumulation of waste of approximately 5 to 7 days - due to the dryness and color of the waste. The interior of the kennel has an accumulation of dirt and debris on the floors. The owner needs to properly clean and sanitize the facility. This is necessary for disease and insect prevention in the kennel.

This affects 10 adult dogs

To be corrected by 05 August 2009
